

Additional Information

DWG

DWG is part of PowerCADD 8. All upgrades and new copies have DWG built in.

Expert Versions

We are supplying an Expert version of PowerCADD, this includes WildTools. This is cheaper than buying them as separates. If you already have a copy of PowerCADD and WildTools this can be considered as an Expert version.

New 2nd/3rd/4th copies

PowerCADD is supplied at a special price for additional copies once you have one current (pc7) license. But this does not include CD or manual. Only install code and dongle.

Multi Pack Upgrades.

A multi pack is 5 copies or more. Upgrades are supplied with 1 manual per 5 copies. If you have a Multi Pack of PowerCADD a minimum of five copies must be upgraded at the same time.

Dongles

Some versions of PC older than PC6 will need dongles replaced. This is a no charge item. Please make sure you tell us what type of dongle you have when you order. If you have the new WIBU dongle this does not need replacing. If you have the older MicroGuard dongle this needs replacing.
